

## **Mozzherin Aleksandr**

Was born on May 21, 1987 in the village of Boguchany of the Krasnoyarsk Krai. In 2004 entered the Faculty of Physics of the Krasnoyarsk State University. In 2009 started his PhD studies in the Institute of Engineering Physics and Radio Electronics of the Siberian Federal University. At the same time he started his educational work at the Department of Modern Natural Science giving the course called «Civil defense». On March 2014 Aleksandr successfully defended his PhD thesis in physical and mathematical sciences. He continues working at the University till now.

The main theme of the scientific interests concerns the process of defect forming in physical, chemical and biological systems of different types. Considering increasing integration of Sciences and Humanities, today he continues his researches on defects in the natural systems and is planning to apply science instruments to some programs of Humanities, in particular to the defects of social institutions that create conditions for the terrorism.
